📍 Birmingham/Huntsville, AL
⌨ M-Rozell

CAREER OBJECTIVE

Ambitious critical thinker with a passion for scalable web applications and working across the full stack, who plans to use these abilities in a front end developer role that pushes the evolution of my skills.

ABOUT ME

I am a designer, a thinker, a team player, a leader. In my previous career, I helped restaurants, bars, nightclubs, and music venues become better and more profitable. Excellence in guest experience and client satisfaction required strict attention to detail, something I excel in. With marketing and branding, whether in-house or on social media, I helped foster identity and purpose for the businesses I worked with. Now, I want to do just that by utilizing my design skills in web development. With a solid understanding of HTML, CSS, JavaScript, and ReactJS, I am eager to put everything that I have learned together with an innovative company.

EDUCATION

Innovate Birmingham
  Web-Dev
UAH-BFA
  Graphic Design

• Florida Atlantic University certificate in Hospitality and Tourism Management	2020

WEBSITE

m-rozell.github.io/maggie-rozell

I created a responsive mobile first website using React, with a focus on design and functionality, to showcase a few of my projects. I used Figma to design a wireframe and prototype for site flow and added projects to highlight JavaScript, Bootstrap, and API use, as well as Adobe for my CV and images. I implemented CSS and styled-components for styling, in addition to Framer Motion and CSS animations for motion components. My code can be found by clicking the portfolio link on my "About" page. Please have fun, click and hover around, and find the hidden cat video!
